WORK SKILLS

SKILLS FOR LOGISTICS

COURSE SUMMARY:

A career in logistics can be extremely rewarding because it covers a whole range of different jobs. It involves everything from driving and delivery to positions in IT, accounting, scheduling, warehousing and management. On this course you will expand your knowledge of the logistics sector to support progression to employment, to an apprenticeship or to further study at a higher level. There are two main parts to this course: route planning; the importance of route planning, benefits of route planning and technologies used in route planning in the smooth running of a business.

ENTRY REQUIREMENTS:

- Aged 19 or over
- Entry level English
